Exhibit "A"

ELECTRICAL SERVICES AGREEMENT

Indefinite Quantity, Fixed Fee
Contract No. 19-S-99-0204

SCOPE OF WORK

1. Intent

It is the intent of this contract to obtain in place, electrical services, as needed and individually ordered by the Authority. Each project will be ordered on a separate Work Order which will be invoiced at the rates specified in the contract. The Authority may order all or none of the services specified over the span of this contract.

2. Duration

Services under the terms of this Agreement are on an indefinite quantity, fixed fee basis for a two (2) year period with provisions for renewal on an annual basis for up to an additional three (3) years at the sole discretion of the Authority.

3. Equipment/Material Requirements

The Contractor will provide all tools, manpower, state and local permits, and equipment necessary to complete electrical projects and repairs. The Contractor, at his sole expense, shall visit the Authority's wastewater lift stations, wells and wastewater treatment facilities to become familiar with the Authority's major electrical equipment. The Contractor's service truck shall be stocked with equipment such as relays, bases, alternators, timers, breakers 120/240 and 30 - 400 volts, Square D and NEMA starters, sizes 0, 1, and 2 coils, contacts, auxiliary contacts – 30 mm and 22 mm, pilot devices, push buttons, 2 and 3 position switches, contact blocks, well and storage tank and probe relays and other parts as may be required for emergencies. The Contractor shall have access to electrical materials for water supply wells, water storage tanks, sewage lift stations and wastewater treatment facilities and related controls. The Contractor shall be willing to stock limited quantities of shielded cable for pressure transducers etc. and have the ability to secure larger starters, soft starters and variable frequency drives within 24 hours, if required.

The Contractor shall have thorough knowledge in the operation of the following equipment: pump wiring connections, motor wiring connections, disconnect switches, motor starters, soft starters, transformers, instrumentation equipment, motor control systems (including but not limited to Rosemont, Precision Digital, Dorsett, Allen Bradley and Benshaw), auxiliary generators, transfer switches, variable frequency drives and the ability to construct new control panels.

4. Licensing and Bonding Requirements

Contractor must hold a Master Electrician's License and a current Contractor's Business License. If necessary, Contractor must be able to obtain bonding.

5. Availability and Response

The contract requires that the Contractor have in place, and maintain for the duration of the Contract, a full-service office within a fifty (50) mile radius of the Authority's office located at 7172 Kennedy Rd, Warrenton, VA 20187. The Contractor must be available to receive a Work Order when issued by the Authority. The Contractor must be on an on-call emergency status, three hundred and sixty-five (365) days a year, twenty-four (24) hours per day.

The Contractor shall start a regular Work Order within five (5) days of receipt and shall respond to an emergency Work Order within two (2) hours of notification.

Regular Work Orders shall be negotiated between the Contractor and the Authority prior to their issuance and shall specify the materials limits, labor limits and completion time of the project for which the Work Order is being issued.
